PROFESSIONAL SUMMARY

AI&Full-StackDeveloper specializing in building intelligent, production-ready software that combines Artificial Intelligence, Machine Learning, LLMs, and modern full-stack engineering to deliver real-world business impact. Co-Founder of NexusAI, driving development of AI agents, intelligent automation, chatbots, CRM solutions, and custom software for modern businesses. Creator of ExamMate AI, an AI-powered study platform integrating the Claude AI API, NLP, OCR, and predictive machine learning into interactive learning analytics.

CORE TECHNICAL EXPERTISE

AI/ ML LLM Integration (Claude AI API), Prompt Engineering, Machine Learning, Predictive Analytics, NLP, OCR, AI Automation, Logistic Regression, Random Forest, Decision Tree, Feature Engineering, Model Evaluation

AI Libraries TensorFlow, PyTorch, scikit-learn, Hugging Face Transformers, spaCy, NLTK, Sentence Transformers, Pandas, NumPy, PyPDF2

Backend Python, Flask, REST API Development, SQLAlchemy, Authentication, Database Design, Full-Stack Development

Databases MySQL, SQL Server

Frontend React.js, JavaScript, HTML5, CSS3, Bootstrap, Responsive Design

Tools Git, GitHub, VS Code, Visual Studio, Microsoft Office

PROFESSIONAL EXPERIENCE

Co-Founder | NexusAI

2026 – Present | Karachi, Pakistan

- Architected and delivered AI-powered software solutions end-to-end, from concept through deployment, for multiple business use cases.
- Designed scalable backend systems using Flask and SQLAlchemy, supporting REST API integration and structured database design.
- Developed AI applications integrating LLMs, NLP, and OCR with machine learning models to automate business workflows.
- Built AI agents, intelligent automation tools, and CRM systems to streamline client operations.
- Led UI/UX planning, database architecture, AI integration, and quality assurance across the full product lifecycle.

Freelance AI & Full-Stack Developer | Self-Employed

- Delivered responsive web applications, automation tools, and AI-powered software for multiple clients, managing the complete lifecycle from requirement analysis to deployment.
- Implemented frontend and backend development, database design, and AI/API integration, with a focus on scalable, maintainable architecture.

FEATURED PROJECTS

ExamMate AI — AI Smart Study Assistant — Python, Flask, Claude AI, Machine Learning, SQLAlchemy, MySQL

- Architected an AI-powered educational platform with 5 core modules: AI Study Buddy, Guess Paper Generator, Smart Exam Predictor, Quiz Generator, and Performance Dashboard.
- Developed OCR-powered document processing supporting scanned and digital PDFs, enabling automated text extraction and content analysis.
- Integrated the Claude AI API to automate evaluation of MCQ, short-answer, and long-answer responses, plus AI-generated notes summarization.
- Applied Logistic Regression, Random Forest, and Decision Tree models to power predictive analytics for exam performance forecasting.

- Built a bilingual interface supporting English, Urdu, and Roman Urdu, expanding platform accessibility for a broader student base.
- Smart Campus Resource & Complaint Management System** — *Flask, MySQL, Bootstrap 5, jQuery*
- Designed a centralized platform integrating complaint submission, resource booking, and real-time status tracking across 3 role-based dashboards (students, staff, and admins).
 - 🏆 Winner — Semester Project Exhibition, recognized for practical impact and technical execution.
- NexusAI Company Portfolio** — *React.js, Vite, GSAP, Three.js* [Live](#)
- Built a modern, animated company portfolio integrating 3D visual effects (Three.js) and GSAP-powered animations to showcase AI agents, chatbots, and CRM solutions.
 - Engineered for full responsiveness across devices, ensuring consistent performance and user experience.
- Artora — Interactive Art Gallery** — *HTML, CSS, JavaScript, Three.js* [Live](#)
- Developed an immersive 3D virtual gallery featuring artist showcases, an interactive auction simulation, and an exhibition booking system.
- CareGroup — Healthcare Management Web App** — *PHP, MySQL, Bootstrap, jQuery*
- Built a multi-role healthcare platform with secure authentication and role-based access control for Admin, Doctor, and Patient users.
 - Designed centralized dashboards to streamline patient management and care coordination workflows.

EDUCATION

BS, Cloud Computing & Information Sciences <i>Sir Syed University of Engineering & Technology (SSUET)</i>	Expected 2028
ACCPAI Diploma <i>Aptech Learning Pakistan</i>	Oct 2024 – Oct 2027
Intermediate <i>Government science college 11-A Karachi</i>	2025
Matriculation <i>Al-Hammed secondary school Karachi</i>	2023

CERTIFICATIONS

- Basics of Python — UniAthena / Cambridge International Qualifications (UK)
- Basics of Machine Learning Algorithms — UniAthena / Cambridge International Qualifications (UK)
- Google Soft Skills Program — Google / Pakistan Freelancers Association (PAFLA)
- Certificate of Participation – Web Development (SMEC'26)

KEY ACHIEVEMENTS

- 🏆 Winner – Semester Project Exhibition, for the Smart Campus Resource & Complaint Management System.
- Developed ExamMate AI, integrating LLMs, NLP, OCR, and predictive machine learning into a single unified educational platform.
- Co-Founded NexusAI, delivering AI-powered applications, automation tools, and intelligent software solutions to modern businesses.

LEADERSHIP

Co-Founder — NexusAI

Leading product strategy, software architecture, AI implementation, and full-stack development for AI-focused client solutions.
